

net2phone Hosted PBX

Your All-Inclusive Cloud Business Phone System

Your business needs more than just a dial tone. net2phone provides you with everything you need to communicate successfully at scale. From robust voice features and powerful messaging tools to powerful analytics and dashboards - net2phone has you covered.

Communicate

Elevate your business with a reliable, all-inclusive, feature-rich communications solution. Advanced features are at your fingertips to take your business to the next level with smarter conversations.

Connect

Experience the ultimate convenience of communicating over the cloud in a seamless, easy to use fashion. The net2phone solution is an untethered business communication that combines state-of-the-art desktop IP phones with the power of mobility, SMS, chat, and webRTC, enabling you to take your business anywhere you go.

Analyze

Identify trends, analyze activity, and get more out of your business phone system with call data analysis. Powerful analytics, reports, and dashboards deliver unique business insights to the events that drive your business success.

Manage

Moves, adds, and changes are in your control and available on demand. The self-service online admin console enables you to respond to changes in your business and make updates quickly and easily 24/7.

A GLOBAL LEADER IN UCaaS SOLUTIONS

Established in 1990, net2phone (a subsidiary of IDT), is a leading National and International Unified Communications provider driven by 1400 employees across six continents and revenues in excess of \$1.2 billion.

With 20+ years of experience in the communications industry, net2phone has built a robust and flexible business communication platform with the idea that smarter conversations will empower your growth.

Phones & Devices

net2phone is compatible and supported by most SIP-compliant IP phones. We offer a wide range of options for desk phones, conferencing phones, faxing, routers, and accessories.

Polycom VVX Phones

Top-of-the-line, all-in-one, one-touch desktop UC solutions designed specifically for executives, managers and knowledge workers.

Cordless Phones

Enhance communication for on-the-go workers in various industries such as warehousing, catering, and retailing.

Polycom Conferencing Phones

Reduce listener fatigue by turning ordinary conference calls into crystal-clear, interactive conversations that sound as natural as being there.

Fax & eFax

Enables cloud based inbound and outbound faxing using a dedicated fax line or an eFax line.

Edgemark Routers

Prioritizes voice over data, ensuring high quality voice on every call.

Headsets

Enables you to answer calls without being tethered to your desk - pick up calls from your desk phone, mobile phone or PC.
