## ARM
YOURSELF WITH
A **COMPETITIVE** ADVANTAGE

24/7 Circuit Monitoring at no cost to you

Ping
Pings are sent to measure packet loss, latency and if a circuit is up or down.

TraceRoute
Traceroute tests are sent to the router to provide circuit performance metrics.

Notification
Notifications can be sent via email to alert you and/or your customer if a circuit goes down.

Dashboard & Reporting
Access a web-based dashboard to view current circuit status as well as a monthly emailed report if requested.

FAQ's

Real-Time Results

Q: Who can be notified?
A: Ambassador Business Solutions and the customer are both notified.

Q: Can it work without a static IP?
A: It cannot. The circuit must have a static IP.

Q: Can I monitor more than just the circuit?
A:. VXSuite is a complete network monitoring application and more options are available. A pre-network assessment is a valuable tool partners can use to determine if a network is ready for VoIP or in general.

Q: Don't the carriers do this for me?
A: Some carriers do provide however the VX Suite circuit monitoring solution allows you to have a consolidated view, alarming and alerting strategy across all carrier's circuits. We believe there is value in having monitoring provided by a third-party.

Q: How do I get started?
A: Let us know once a connectivity provider has been selected.. There's some documentation that allows us to capture the information we require.
